Tube Manipulation Specialists

As a valued Kwalkraft client, you are more than welcome to supply your own material for any bending job that you require us to do for you. The only requirement that we have in such cases is that you purchase your material from an approved tube merchant, as we have experienced problems, in the past, with the quality of tubing supplied by certain merchants. For your convenience, we have included a list of merchants that supply material of outstanding quality. Please telephone or e-mail the merchant closest to you for a quotation.
